1	Understanding Intern Learning in the Emergency Department: A Thematic Analysis of Post-Shift Reflections	Qais Abuagla
2	Evaluation of an AI-Scribe System for Clinical Documentation in the Emergency Department: A pilot study	Hamed Akhlaghi
3	Penthrox® in EDs – A Cost-Minimisation Analysis	Julianne Alexander
4	Play amid pressure: Multidisciplinary perspectives on the role of child life therapy in an Australian tertiary hospital emergency department	Samar Al-Shamaa
5	Fast Relief, Slow Discharge: Rethinking Intravenous Chlorpromazine for Migraine	Sophie Anderson
6	Contemporary Tranexamic Acid Use in Trauma: A Retrospective Review of Dosing Practices	Sophie Anderson
7	Efficacy of antiemetic medication in the emergency department: a single-centre, prospective observational study	Emilie Ayre
8	ECG Traffic Light System to Reduce Clinician Interruptions	Simone Bartlett
9	Emergency doctors' perception of the ECG signing process.	Simone Bartlett
10	From Recommendation to Reality: The Impact of ACEM Staffing Guidelines on Emergency Departments	Cassandra Beer
11	Automating Documentation in Pre-Emergency Care: An Artificial Intelligence Transcription Solution for the Victorian Ambulance Clinical Information System (VACIS).	Michael Ben-Meir
12	Mind the Gap: What Emergency Department Complaints Reveal to Healthcare Providers	Muhammad Nursuhairi Bin Sumarni
13	Distribution of Aortic dissection scores in an ED population	Matthew Birdsey
14	Investigation of Pulmonary Embolism in Pregnancy and Evaluation of the Pregnancy Adapted YEARS Algorithm	Matthew Birdsey
15	Myth busting – Reports of radiological 'tension' features are not associated with physiological instability in ED patients with primary spontaneous pneumothorax	Matthew Birdsey
16	The Impact of a Territory-Wide Protocol on First Dose Antibiotic Route in the Canberra Hospital ED	Marita Bolic
17	Reduction in IV Fluid Use Following Implementation of a Shortage-Response Protocol in Australian Capital Territory EDs	Marita Bolic
18	Clinical incidents associated with behaviours of concern in Australian Emergency Departments: A mixed method, multi-site cohort study	Addison Borst
19	A retrospective review of the use of ultrasound and the feasibility of performing transoesophageal echocardiogram in patients in the emergency department in cardiac arrest.	Robert Browning
20	Aligning Practice with Policy: A Review of Lumbar Spine X-ray Ordering Indications Against ACQSHC Guidelines	Irene Bryan
21	A rare complication from a minor head injury: Case presentation.	Antonio Calvo Castro
22	Co-designing the first indigenous ED clinic in Aotearoa	Justine Camp
23	Activation of Code Grey in the Emergency Department: A Retrospective Review	Brendan Chen
24	Utility of MDW as a Rapid Screening Tool for Bacteremia in the Emergency Department: A Retrospective Analysis	Tse-hao Chen
25	Overutilisation of Neuroimaging for Acute Dizziness in the Emergency Department: Prevalence and Implications	Joanne Chia
26	Forecasting Out-of-Hospital Cardiac Arrest Incidence Using Time Series Models: A Comparative Analysis of ARIMA and LSTM	Yong Soo Cho
27	Variation in Weight-Based Dosing of Salbutamol in Children with Acute Asthma in Paediatric Emergency Departments	Simon Craig
28	The relationship between patient or caregiver concern for clinical deterioration and critical illness in an adult population	Simon Craig
29	A framework for analysis of emergency department complaints to improve patient-centred care	Simon Craig
30	"My child is too sick for a GP!" Reasons for paediatric ED visits: a survey of parents and carers.	Simon Craig
31	Bandages for Bites, are we doing it right?	Kate Cranswick
32	Assessing the utilisation of the Febrile Illness Guideline in management of febrile children up to 3 months of age who present to Darling Downs Hospitals	Jessica Dale
33	Seventeen-Year Audit of Firework-Related Eye Injuries on Territory Day in Australia: An Emergency Department Perspective	Ananyaa Devanathan
34	Rural Research in Emergency Care Network (RECCN) The First Twelve Months of a Dynamic New Research Group: Building the Wave	Tahnee Dunlop
35	Charting the Break: Rural Clinicians Prioritise the Next Wave of Research	Tahnee Dunlop
36	Absent Initial Clinical Impressions in ED: Time to Get Back to Basics	Diana Egerton-Warburton
37	Say 'No' to the Just in Case Cannula: Using consumers' lived experience to educate emergency clinicians	Diana Egerton-Warburton
38	From Silos to Synergy: Structuring Inclusive Clinical Support Time through Collaboration Hubs in a Large Emergency Department	Nasim Erfani
39	Environmental and Clinical Consequences of Neuroimaging Overuse in the Emergency Department: A Carbon Footprint Perspective	Qing Hui Fang
40	Optimising hyperkalaemia management: Impact of a prescribing and monitoring form on hypoglycaemia and blood glucose monitoring	Samuel Ford
41	Empowering medical students to share and implement patient safety improvements in the emergency department. Small ideas can generate big waves in enhancing patient safety.	Jane Friedrich
42	Closing the Gap: Cervical Spine Injury Detection and Management in Regional Emergency Departments	Wai Yan Bettina Fung
43	Insights into Emergency Airway Management: A Regional Hospital Audit Using ANZEDAR	Wai Yan Bettina Fung

ACEM ASM 2025 Poster Listing

No.	Poster title	Presenter
44	Impact of targeted education on non-technical skills in emergency department resuscitation teams: A clinical audit	Prabhani Ganegoda
47	Safe observation of patients post droperidol sedation in the Short Term Treatment Area within an Emergency Department: a retrospective series.	Georgia Harburg
48	Turning the Tide of Time - Sustained Improvement in Ambulance Offload Times at Peninsula Health	Max Harvey
49	Comparing Local and International Clinical Decision Rules for Invasive Bacterial Infection in Febrile Infants	Shefali Jani
50	Virtual ED Short Stay Unit in Practice: Results from the First 100 Children	Shefali Jani
51	Paediatric interdisciplinary emergency medicine education for the urban district CMO workforce – iSEIC and AiSEIC.	Shefali Jani
52	Impact of Procalcitonin Assay Selection on Clinical Outcomes in Febrile Infants: A Retrospective Cohort Study in an Australian Emergency Department	Shefali Jani
53	Time Lost, Potential Lost: Stroke Care Challenges for Under-50s in an Australian ED	Christopher Jones
54	Paeds with a Wheeze: Improving Patient Flow with Nurse Led Stretching of Inhaled Salbutamol	Faye Jordan
55	Safely reducing CTcub use in low-risk patients with ureteric colic attending the Emergency Department	Laura Joyce
56	Predictors of return to work following major trauma in Aotearoa New Zealand	Laura Joyce
57	Management of Atrial Fibrillation with Rapid Ventricular Response in Emergency Departments across Aotearoa New Zealand	Laura Joyce
58	Safely reducing hospital admission for low-risk Transient Ischaemic Attack patients attending the Emergency Department	Laura Joyce
59	Patterns of Substance Overdose in Adults Aged 65 and Older: A Community Hospital Perspective	Tomohide Kamiya
60	Resuscitative Hysterotomy: Constructing a Simple, High-Yield Task trainer for Emergency Training	Molly Kehoe
61	Impact of Cancer History on Prehospital Transport Delays to the Emergency Department: A Nationwide Logistic Regression Analysis	Minjoung Kim
62	Acute Nursing Home General Emergency Line (ANGEL) Programme Reduces Emergency Department Attendances And Hospital Admissions For Nursing Home Residents	Jessica Kong
63	Efficacy and Safety of Inhaled Methoxyflurane for Acute Traumatic Pain in Emergency Settings: A Systematic Review of Randomised Controlled Trials	Louisa Lam
64	Rotational Thromboelastometry versus Conventional Coagulation Tests in Chronic Liver Disease: A Threshold Comparison	Akmez Latona
65	Viscoelastic Assay in Chronic Liver Disease: Profiling Coagulation in the Emergency Department	Akmez Latona
66	The Viscoelastic Assay Landscape in Queensland, Australia: An Analysis of Use, Indications, and Integration	Akmez Latona
67	Abolishing PT-Derived Fibrinogen? Clauss and Viscoelastic Assays Outperform Across Queensland	Akmez Latona
68	Early Versus Delayed Advanced Airway Management in OHCA: A Nationwide Korean EMS Cohort Study	Jungho Lee
69	Risk Factors for Middle Ear Barotrauma in Patients with Carbon Monoxide Poisoning Undergoing Monoplace Hyperbaric Oxygen Therapy: A Retrospective Cohort Study	Jungho Lee
70	Treatment approaches and outcomes for hypertensive urgencies in an urban district emergency department: a retrospective observational study	Yit Jian Lee
71	The management of hypertensive urgencies in Queensland emergency departments: an online survey of emergency physicians.	Yit Jian Lee
72	The Impact of Transitioning from a 2-Shift to a 3-Shift System on Burnout among Emergency Physicians (EPs): A Single-Center Preliminary Study	Daesung Lim
73	Clinical features and biomarkers of snakebite envenomation: a review from Central Queensland	Kit Lindgren
74	A case of a bizarre abdominal radiography of a young male seen in the emergency room	Xanicia Long
75	Impact of clinician education on emergency department mechanical restraint: an interrupted time-series study	Daiv Lown
76	Assessing the utilisation of the Febrile Illness Guideline in management of febrile children up to 3 months of age who present to Darling Downs Hospitals	Maddison Lucas
77	Evaluation of a pilot nurse-led telephone triage service in Singapore (NurseFirst) using the RE-AIM Framework	Vikram Manian
78	Evaluating the Reactions Phase of Healthcare Simulation Debriefing Following In-Situ Simulation Scenarios	Nimisha Mariyam Thomas
79	A retrospective evaluation of emergency department electric scooter impact before and after the introduction of a hire electric scooter service.	Amanda McConnell
80	Contributors to non-compliance with a clinical practice guideline for suspected myocardial infarction at a cardiac emergency department	Sean Ng Kwet Chi Ng Ying Kin
81	Quality Improvement and Workplace Wellbeing Capacity and Capability in Aotearoa New Zealand Emergency Departments.A Nationwide Mixed Methods Survey	Mike Nicholls
82	Investigating the impact of a multicomponent positive participatory organisational intervention on burnout in New Zealand emergency department staff: a prospective, multisite, before and after, quantitative study (QILS4WoWe@NZEDs)	Mike Nicholls
83	Barista in the ED for ACEM Wellness Week: a report	Mike Nicholls
84	Detection of SARS-CoV-2 in aerosol samples in high acuity hospital settings, Sydney, Australia	Adriana Notaras
85	Optimal Duration of Extracorporeal Cardiopulmonary Resuscitation for Favorable Neurological Outcomes	Hyoseok Oh
86	Delayed chest drainage after severe thoracic trauma: patterns and predictors	Noriyuki Okamoto
87	Emergency Presentations in Hikikomori: A Case Series of Hospitalized Socially Withdrawn Adults	Yutaro Omura
88	Audit of Rib Fracture Management in the Emergency Department: Gaps in Timely Analgesia and Escalation	Maia Osborne-Grinter

No.	Poster title	Presenter
89	Reducing post-fall emergency department transfer from residential aged care facilities: the Falls Outreach and Residential Mobile Assessment Team (FORMAT) before-and-after study	Patrick Owen
90	Necrotising fasciitis: The patient pathway from the emergency department to theatre	Jack Parker
91	Data Extraction, Cohort Selection and Risk Stratification from Electronic Health Records of Emergency Department Suspected Acute Coronary Syndrome Patients: The Chest Pain DECoDeR Study	Siegfried Perez
92	Developing Emergency Care systems in Low- and Middle-Income Countries: a scoping review to examine the role of leadership and governance.	Georgina Phillips
93	Decreasing low clinical value pathology tests in the Emergency Department: audit of urine microbiology and culture use at a large Regional Centre.	Sophie Pickavance
94	The Knock vs The Block	Sandhya Prayaga
95	Are emergency health systems prepared for rising temperatures?: A mixed methods analysis assessing heat-wave vulnerability of Victorian (Australia) Emergency departments"	Mark Putland
96	Blood Biomarkers for the Management of Paediatric Mild Traumatic Brain Injury: A Systematic Literature Review and Meta Analysis of Sensitivity and Specificity in Predicting CT Abnormalities in Emergency Settings.	Lachlan Ragg
97	Incivility in the Emergency Department: A Snapshot of Staff Experiences	Ainsley Richards
98	Hyperemesis Gravidarum and HITH at The Canberra Hospital - an Emergency Department Perspective	Drew Richardson
99	Is did-not-wait rate still a good proxy measure for waiting time?	Drew Richardson
100	Access Block, occupancy and waiting time over a dozen years in a tertiary hospital	Drew Richardson
101	Hospital in the home for hyperemesis gravidarum: patient experiences and implications for service improvement	Drew Richardson
102	Exploring senior emergency physicians' perspectives on the inclusion of clinical biomarkers in clinical decision rules for CT head use in patients with suspected traumatic brain injury	Alice Rogan
103	An inexpensive and ultrasound-compatible lumbar puncture model using SCOBY as an effective simulation tool	Alice Rogan
104	A feasibility pilot study investigating the use of Neuroflex VR goggles for oculomotor testing in patients presenting to the ED with suspected concussion	Alice Rogan
105	Optimising Emergency Intubation: Audit and Quality Improvement in a Metropolitan ED	Mostafa Salem
106	Reducing ED occupational violence and aggression	Ainslie Senz
107	Mechanical restraint and the patient journey	Ainslie Senz
108	Case series of resuscitative hysterotomy in pregnant trauma patients performed in the Emergency Department of a Level One Major Trauma Service.	Thomas Shanahan
109	Comparative analysis of the demographics, vital signs, injury patterns, care pathways, interventions and outcomes of English and Welsh major trauma patients injured by high versus low energy transfer mechanisms in 2019.	Thomas Shanahan
110	Exploring medication overdoses at a Japanese community hospital: a cross-sectional study	Taro Shijubo
111	The effectiveness of the implementation of the virtual hospital model of care for low back pain (Back@Home)	Chathurani Sigera
112	Assessment of Burnout Syndrome among the emergency care professionals working in Emergency Departments of National, Teaching, and District General Hospitals in Sri Lanka, a Multi-Center Study	Nicholas Moore
113	Regular in situ airway simulations, do they improve medical and nursing confidence, teamwork and familiarity with endotracheal intubations in the emergency department?	Charles Snodin
114	Stakeholder Perspectives on the Southeast Melbourne Virtual Emergency Department: A Qualitative Study	Myles Sri-Ganeshan
115	Advancing environmental sustainability in emergency medicine with the RCEM GreenED Framework	Zoe Jane Steley
116	Prevalence of coronary artery disease for Aboriginal and Torres Strait Islander people accessing emergency department care with suspected acute coronary syndrome	Laura Stephensen
117	Association between the Area of Maximal Compression Determined with Intra-Arrest TEE and End-Tidal CO ₂ in Cardiac Arrest: A Resuscitative Transesophageal Echocardiography Collaborative Registry (rTEECORE) Study	Scott Stirling
118	TEE Evaluation of Shock in Critically Ill Patients: An Analysis of the Resuscitative TEE Collaborative Registry (rTEECORE)	Scott Stirling
119	Deep Learning-Assisted Classification of Chest Compression Location Using Intra-Arrest Transesophageal Echocardiography	Scott Stirling
120	Ultrasound-Guided Peripheral Intravenous Cannulation in the Hospital Setting: Challenges, Barriers & a Teaching Intervention	Gemma Symons
121	Beyond the Bone: Clinician Perspective of Procedural Discomfort and Barriers in Paediatric Intraosseous Access	Doris Tham
122	Can Targeted Education Improve Junior Doctors Confidence for Paediatric Emergency Practices?	Doris Tham
123	Management of pre-school asthma in Canberra emergency departments: The impact of changes to asthma guidelines	Danelda Theron
124	Republic of Singapore Air Force (RSAF) Helicopter Search-And-Rescue (SAR) Medical Evacuation: A 10-Year Study.	Aaron Thio
125	Is the routine use of computed tomography (CT) scans for elderly head injured patients in the emergency department supported?	Rhoda Thornton
126	ED VIPs: Who are they and how can we help them?	Lauren Thurlow
127	A 13-month review of adult Emergency Calls in a Regional Emergency Department Short Stay Unit	Lauren Thurlow
128	Clinical outcomes for Emergency Department presentations of sepsis managed on a clinical pathway: A systematic review and meta-analysis	Lauren Thurlow
129	Paediatric MET Calls – case series of 18 paediatric emergency calls in the ED	Lauren Thurlow
130	ED presentations during the cruise ship season	Lauren Thurlow

No.	Poster title	Presenter
131	Paediatric short stay – From ED to the ward. Evaluation of the utilisation of a paediatric short stay unit by the emergency department over a 12-month period.	Lauren Thurlow
